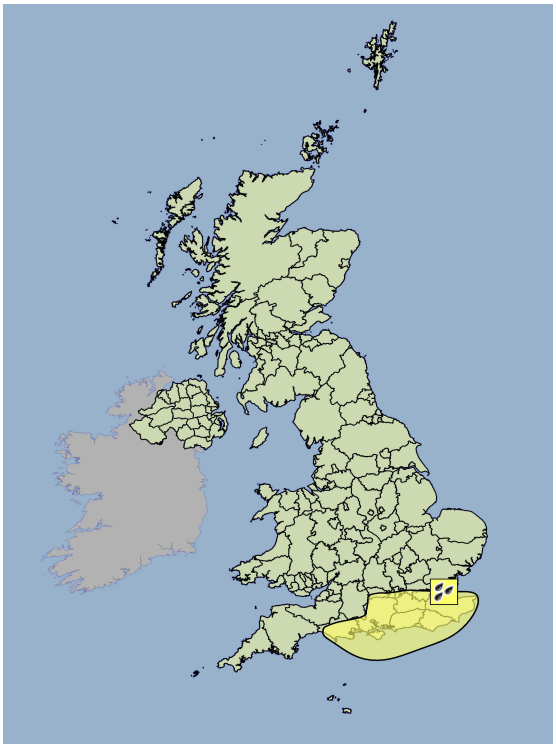
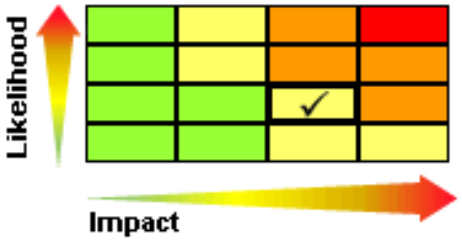
National Severe Weather Warning Service





Chief Forecasters Assessment
A frontal system will continue to move northeastwards across England on Saturday. The heaviest rain is likely to be across southern areas where, with ground already saturated, further localised flooding is likely.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **11:30 on Sat, 04th Jan 2014** until **18:00 on Sat, 04th Jan 2014**

A spell of heavy rain will continue to affect southern parts of England during Saturday afternoon, clearing eastwards by late evening. A further 10 to 20 mm of rain is likely in places.

The public should be aware of the risk of further localised surface water flooding and disruption to travel.

This is a further update to the Warning issued earlier on Friday to extend the expiry time of the warning over southern and southeastern England.

This warning has been updated to include southwest England.
